Test Case ID	Test Type	Test Scenario	Test Case	Pre Conditions	Test Step	Input Data	Expected Result	Actual Results	Pass/Fail
Example	Expected	*Add Item Button Functionality*	*Check output of item on treeview proceeded by button press*	*Entry widget must have a input*	*1. Open Window* *2. Navigate to interactive widgets* *3. Input a task that would like to be completed in entry* *4. Press the Add Item Button*	*- Do the laundry*	*Display "Do the laundry" in the treeview widget*	*Displayed the "Do the laundry" task in the treeview widget*	Pass
1	Expected	More Decal Instanatiation	Check the instantiation of the new Background TextureRect Node	At least 1 testing window opened	1. Open Window	(nil)	Check that the new background png is displayed when the user opens the game window	Successfully displayed new background png	Pass
2	Expected	More Decal Instanatiation	Check that the new button decals are imported into the title screen scene	At least 1 testing window opened	1. Open Window 2. Navigate to all interactable widgets	(nil)	Check that the new button pngs replace the old button nodes and continue to work upon retest	Successfully worked upon retest	Pass
3	Expected	Background Music Instantiation	Check that the background music plays when the game window opens	At least 1 testing window opened	1. Open Window	(nil)	Background music should start playing immediately after the user opens the interface	Successfully plays mp3 through a streamed audio bus node	Pass
4	Invalid, Boundary	Multiplayer Error	Check the sustainability of the lobby join system	2 Godot Debug Windows Opened	1. Open Window 2x 2. Host Lobby on One Instance 3. Join Lobby on another through input of lobby code	- Host Button - Join as Client Button	Terminal should display that the player could not find a lobby and will remain on the main title screen	Successfully remained in this state	Pass
5	Expected	Stakeholder Feedback incorporation	Retest the condiiton where the player gains a point from an elimination	2 Players have joined a lobby	1. Open Window 2x 2. Host Lobby on One Instance 3. Join Lobby on another through input of lobby code 4. Begin Game through Host 5. Use Host Client to Shoot at Joined Client	- Host Button - Join as Client Button - Begin Game (Start Game Button)	All players that have joined should be able to see a live everchanging updated scoreboard when someone gets a elimination	Failed to allow player 1, the server host to be able to gain any points that appear on the scoreboard	Fail
6	Expected	Stakeholder Feedback incorporation	Retest the condiiton where the player gains a point from an elimination	2 Players have joined a lobby	1. Open Window 2x 2. Host Lobby on One Instance 3. Join Lobby on another through input of lobby code 4. Begin Game through Host 5. Use Host Client to Shoot at Joined Client	- Host Button - Join as Client Button - Begin Game (Start Game Button)	Server Host should now be able to relay its points earned upon the score leaderboard	Successfully gave a point to the host	Pass
7	Expected, Invalid	Retest Player Spawning Spontaneous	Check that players on the map respawn accordingly due to trialling saying otherwise	Atleast 2 Players have joined a lobby	1. Open Window 2x 2. Host Lobby on One Instance 3. Join Lobby on another through input of lobby code 4. Begin Game through Host 5. Wait till mutliple instances of attacking game conditions have occured to display the spontaenous spawning after each round	Host Button Join Client Start Game	All Players should respawn to dedicated spawn locations on each map every round	No Changes were needed to retest this issue, therefore when testing I was unable to replicate this issue (likely a fluke during trialling)	Pass
8	Expected	Player Game Win Condition	Check that player meeting temporary condition of 2 points prints winner	Atleast 2 Players have joined a lobby	1. Open Window 2x 2. Host Lobby on One Instance 3. Join Lobby on another through input of lobby code 4. Begin Game through Host 5. Host Player shoots client Player	Host Button Join Client Start Game Shoot Button	Terminal should print winner player	Successfully printed player and winner string state	Pass
9	Expected	Player Game Win Condition	Check that after winning, new scene is created for players to leave once the game has finished	Atleast 2 Players have joined a lobby	1. Open Window 2x 2. Host Lobby on One Instance 3. Join Lobby on another through input of lobby code 4. Begin Game through Host 5. Host Player shoots client Player until Host Wins	Host Button Join Client Start Game Shoot Button	Should change to new scene	Successfully transferred to new scene	Pass

	10	Expected	Player Game Win Condition	Check that other ui nodes and background gameplay stops to allow the player to finish playing the multiplayer lobby game	Atleast 2 Players have joined a lobby	1. Open Window 2x 2. Host Lobby on One Instance 3. Join Lobby on another through input of lobby code 4. Begin Game through Host 5. Host Player shoots client Player until Host Wins	Host Button Join Client Start Game Shoot Button	Player should return back to the main menu disconnected from the hosted server and the host should also return to the main menu with its current lobby being terminated.	Although did reset the player back to the main menu, global variables did not reset therefore the player was still simulated to be already in a lobby Also experienced error for client due to host leaving prior	Fail
	11	Expected, Boundary	Player Game Win Condition	Retest Host Leaving before Client	Atleast 2 Players have joined a lobby	1. Open Window 2x 2. Host Lobby on One Instance 3. Join Lobby on another through input of lobby code	- Host Button - Join as Client Button	Host should terminate the current lobby returning clients to the main menu	Successfully removed client from hosted server	Pass
	12	Expected	Retest Scoreboard	Check that the players all share the same scoreboard data	Atleast 2 Players have joined a lobby	1. Open Window 2x 2. Host Lobby on One Instance 3. Join Lobby on another through input of lobby code	- Host Button - Join as Client Button	All clients should have the same scoreboard data during gameplay	Failed to properly show duplicated information on all clients	Fail
	13	Expected	Mouse Interaction Retest	Check that Mouse Cursor works after changing authority reference	At least 1 testing window opened	1. Open Window 2. Navigate to all interactable widgets	Mouse Interaction	Mouse should inherit the correct colour of player authority upon a new game	Failed to take up authority and therefore had a white colour regarding its authority	Fail
	14	Boundary	Round Win Condition	Check win condition	Atleast 2 Players have joined a lobby	1. Open Window 2x 2. Host Lobby on One Instance 3. Join Lobby on another through input of lobby code 4. Begin Game through Host 5. Host Player shoots client Player	Host Button Join Client Start Game Shoot Button	Round should skip the timer and head to the next sequence once players have died	Successfully skipped to next sequence however was not the correct sequence of card selection	Fail
	15	Invalid	Player Leave Conditions	Check that when any player leaves, the entire lobby resets	Atleast 2 Players have joined a lobby	1. Open Window 2x 2. Host Lobby on One Instance 3. Join Lobby on another through input of lobby code	Host Button Join Client Start Game Shoot Button	Player that leaves the lobby should ultiamtely terminate the game during a game mid progress, otherwise the player would leave the game in the pregame loading area.	Successfully terminated lobby	Pass
